CV Inform

Target User Profile:
The CV is destinated to empress in computing sector, thats the reason why I have in the Qualities the knowledges of computing world.

Information Architecture:
At first I have a little description of myself and my picture to show the empress who I am, in the bottom section I have the Qualities of the computing world for the reason i explain in the previous paragraph, next to this I have the laboral's experience to show to empress where i worked before, and the right I have all of my studies and languages I can speak.
In very bottom i have extra information of myself and the social media if they wanna see it.

Visual Design:
In the visual design I played with the scale of gray to make it attractive at first look, and I organized the information for importance, thats why the laboral experience and studies and languages are one beside the other, in that way the empress at first look can see my laboral experience and my languages and studies at the same time.
